

Seclore File Format Support

File formats and applications

This document covers the file formats, applications, and operating environments supported by Seclore agents for protecting, and accessing files on various platforms.

1. **Seclore for Windows:** The Seclore agent that supports the maximum functionality, file formats, applications, and operating environments. It is available for Windows and requires administrative privileges to install.
2. **Seclore for Windows - Adminless:** The Seclore for Windows agent can also be installed without Admin privileges and provides the same recipient experience as the full Windows agent. This will eventually replace the Lite for Windows agent over time.
3. **Seclore Lite for Windows:** A light-weight client for Windows that can be installed without administrative privileges. This agent will be discontinued from 01 June, 2021. Thereafter, it will be replaced with the Seclore for Windows – Adminless agent.
4. **Seclore for Mac:** A light-weight client for Apple Mac that requires administrative privileges to install.
5. **Seclore for iOS:** A free app for accessing protected files on iOS devices.
6. **Seclore for Android:** A free app for accessing protected files on Android devices.
7. **Seclore Online:** A secure web-based portal for accessing protected files in a browser.
8. **Seclore for Outlook on the web:** An add-in for Outlook on the web for protecting emails and attachments.

1. Seclore for Windows - Admin and Adminless

1.1. System Requirements

1.1.1. Minimum

- RAM: 2 GB
- Hard Disk space: 100 MB
- Browser: Internet Explorer 11

1.1.2. Recommended

- RAM: 4 GB
- Hard Disk space: 500 MB
- Browser: Internet Explorer 11

1.1.3. Operating System Supported

- Windows 8.1 and 10

1.2. Formats Supported
