

This document covers the file formats, applications, and operating environments supported by Seclore agents for protecting and accessing files on various platforms.

The different Seclore agents are as follows:

1. **Seclore Desktop Client:** The Seclore agent that supports the maximum functionality, file formats, applications, and operating environments. It is available for Windows and requires administrative privileges to install.
2. **Seclore Lite for Windows:** A light-weight client for Windows that can be installed without administrative privileges.
3. **Seclore Lite for Mac:** A light-weight client for Apple Mac that can be installed without administrative privileges.
4. **Seclore Lite for iOS:** A free app for accessing protected files on iOS devices.
5. **Seclore Lite for Android:** A free app for accessing protected files on Android devices.
6. **Seclore Lite Online:** A secure web-based portal for accessing protected files in a browser.
